

Supercarrier

2 X 1 HOUR

EPISODIC BREAKDOWN

1. Into the Danger Zone

We take a tour of this massive mobile city at sea. We explore the hanger bay, flight deck, primary flight and air traffic controls, from which the Reagan's primary objective is achieved, the launch and retrieval of legions of strike fighter jets.

We meet the captain and crew, from the fuel and weapons handlers to the chefs, medics, and garbage men that keep the supercarrier in perfect working order. Then we go below deck for a look at everything from the top secret nuclear reactors to a barracks and mess halls that provide a home away from home for the 4,000 men and women aboard.

Take a full and uncensored, behind the scenes look at the American military's ultimate weapon.

2. Airport At Sea

Join the crew on board the USS Ronald Reagan. We explore the more than 60 aircraft, from strike fighters to radar jamming jets to early warning intelligence aircraft that make up the carrier's air wing.

But despite the billions of dollars of technology, the Reagan is still run by human hands. We join the pilots for lunch, before they take to the skies. We watch the G3 Division as they assemble a 500lb bomb by hand. From combat aircraft and weaponry to the safety drills that simulate everything from mass casualties to explosive leaks, this is a human story, set on board a spectacular engineering marvel.
