Wild Korea

2 x 60'

EPISODIC BREAKDOWN

1. Voices of Nature

Korea is known as a modern, high tech nation; but beyond the bustle of the cities there's a land of stunning natural beauty and remarkable wildlife. There are lush wetlands and mudflats in contrast to the soaring mountains and turbulent seas; and the beautiful goshawk, bottleneck dolphin and curious racoon dog thrive alongside Korea's traditional people as they have for many thousands of years.

2. Beyond Borders

The notorious demilitarized zone of Korea has existed on the boundary of two warring nations for nearly 70 years where a tense standoff still remains. However, amidst the barbed wire fences and thousands of land mines, a unique natural wonderland from wild boar to giant hornets to rare cranes peacefully co-exist alongside the ashes of war.
