Breakdown, The

5 x 7-9'

EPISODIC BREAKDOWN

1. Climate Change: How We Got Here

This episode kicks off the series with a big picture look at the history of our planet.

2. Climate Denial: 50 Years of Lies & Misinformation

This episode explores the role of fossil fuels companies in denying the science around climate change and investing millions into misinformation campaigns to confuse the public and seed doubt.

3. Climate Crisis: Nine Years Left to Avoid Disaster

This episode addresses why we have just 9 years left to halve global emissions. It takes a look back at all the COPs of the past, the crucial turning points of the Paris climate agreement, the 2018 IPCC report and why COP 26 in Glasgow is so crucial.

4. Climate Justice: An Unequal World

This episode highlights how climate change is first and foremost a social justice issue, looking at the intersection between racism and climate change and exploring the need for a just transition.

5. Climate Solutions: What You Can Do

This episode explores climate solutions. We look at the difference between individual and systemic change and ultimately why we must all join the climate movement.
