### Age Of The Big Cats

3 x 60', 2018, 4K

We think we know big cats pretty well, don't we? Well actually, we don't. In this series, recent scientific discoveries shed new light on the extraordinary prehistory of big cats and their ascent to world domination. How did these giant carnivores survive the ice age extinctions that wiped out the sabretooths, and persist into the present day? When we learn that the jaguar was once found in the UK, the tiger ranged from Siberia to Turkey, and the lion, far from being African was a true worldwide phenomenon, it's clear that our view of cats has been blinkered. What happened? Brand-new night vision systems, super slow-motion cameras, and cutting edge computer-generated imagery of a bygone age takes us on a tantalising trail of evidence to answer these questions, revealing incredible and surprising stories of the world's most charismatic predators: The big cats.

Terra Mater Factual Studios/CuriosityStream/Ammonite

### The Blind Monkey

1 x 60', 2016, HD

Follow a year in the life of a young blind macaque monkey and its family. Few monkeys born blind survive infancy, but this youngster is now 15 months and defying all expectations. Rhesus monkeys have a complex social order. The mother formally a queen is now losing her status caring for her disabled child. This film tells the story of a devoted mother, her blind son and adolescent daughter as they struggle against all odds to survive.

LIC China

### Amazing Pigs

1 x 60', 2018, 4K

We may not have noticed it yet, but pigs are slowly taking over the planet! There are an estimated two billion of them, living on every continent except Antarctica. Humans are partly to blame – pigs have been a part of our lives for thousands of years. In this film, we follow the many lives of pigs and ask, what is the key to their remarkable success?

Terra Mater Factual Studios/Smithsonian Networks/  
Humble Bee Films

### Beasts In The City

1 x 60', 2018, HD

They glide through our urban jungles, breed on the river's edge and feel quite at home in our backyards. You thought they were far away, in the wild. You're wrong. They're here. The urban invaders – a red squirrel nesting in the bird feeder, a duck on the balcony or a hedgehog at the cat food dish. Join us on a journey into a well-known territory – with very unexpected encounters...

Terra Mater Factual Studios

### Born In The Wild

4 x 60', 2014, HD

'Born In The Wild' explores the reproductive behaviours and biology of the animal kingdom. Focusing on the elephant, dolphin, kangaroo and orangutan, we take a look at how these animals find, fight for and woo the opposite sex. We explore how they mate, give birth and raise their young in extreme environments. Why do male elephants transform into sex crazed monsters during musth? How do orangutans give birth safely high in the trees? Why is the pregnancy of kangaroos so short? And how do dolphins mate at high speed?

Windfall Films

**Borneo: Earth's Ancient Isle**  
1 x 60', 2019, 4K

The island of Borneo has spent more time in the tropics than any other region on Earth – some 120 million years. In this time, the conditions have combined to create a realm full of bizarre species. The world's tallest tropical tree and the smallest bears all live here. Millions of years of rainfall have washed away vital nutrients, fuelling an intense competition for life. On Borneo's mountains, carnivorous plants use raindrops to catch prey. In the rainforests, male orangutans call out to deter would be rivals. On the coast, millions of jellyfish are turning to the sun to get the nutrients they need. But it is in and around Borneo's caves that the competition for nutrients is at its most intense. At dusk, as hundreds of thousands of bats leave the cave, they are hunted down by pied hornbills – birds with giant bills designed for picking off small fruits and insects.

**Terra Mater Factual Studios**

**China's Swan Lake**  
1 x 60', 2018, HD

The largest single concentration of whooper swans in China live on a newly and unintentionally created wetland. A remarkable place in the heart of central China, Sanmenxia Wetland Park consists of a 385 square kilometer reservoir, two artificial lakes and surrounding wetlands. It is estimated that over 10,000 whooper swans inhabit the park. 'China's Swan Lake' shows the lives of a whooper swans family that live on the lake along with invasive black swans and blue herons.

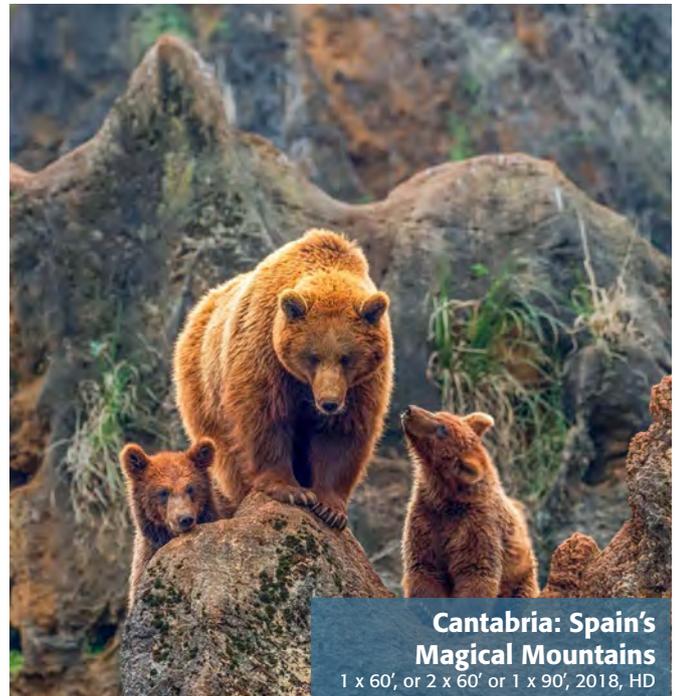

**LIC China**

**The British Garden: Life And Death On Your Lawn**  
1 x 89', 2017, HD

The British back garden is a familiar setting, but underneath the peonies and petunias is a much wilder hidden world, a miniature Serengeti, with beauty and brutality in equal measure. In this documentary, Chris Packham and a team of wildlife experts spend an entire year exploring every inch of a series of interlinked back gardens. They want to answer fundamental questions: how much wildlife lives beyond our back doors? How good is the great British garden for wildlife?

**Windfall Films**

**Cantabria: Spain's Magical Mountains**  
1 x 60', or 2 x 60' or 1 x 90', 2018, HD

The Cantabrian Mountains extend along the Atlantic coast of northern Spain for nearly 500 km's from the east Pyrenees to Galicia. Home to a variety of wildlife including chamois, red deer, wildcats and wolves, the Cantabrians are also the westernmost European habitat of brown bears. Harsh conditions will drive prey into the valleys and into the jaws of hungry wolves. As the snow starts to melt, creatures that spent the winter in hibernation emerge from their dens. Female Brown bears, anxious to feed themselves and their cubs, seek out the first fresh grasses. Starvation is not the only threat, male bears in search of partners can attack and kill young bears. Atlantic salmon migrate from ocean to hinterland to reach their ancestral spawning grounds. The journey will take them into the path of certain danger, along treacherous rapids where ravenous bears await.

**Terra Mater Factual Studios/Wanda Visión S.A.**

**Circus Of The Wild**  
1 x 60' or 1 x 90', 2018, HD

Barbary macaques are up to mischief in Gibraltar, pickpocketing unwary tourists. Their relatives, the Japanese macaques, are much more laid back. On Ellesmere Island, the wolves there have found a lost phone, now they're playing football with it. They make us wonder. Especially when they turn up in unexpected places. Like little droll penguins that toddle over the sandy beaches of South Africa. Shouldn't they be somewhere a little, well, cooler?

**Doclights/NDR Naturfilm/Terra Mater Factual Studios** 

**Cuddly & Wild: Adorable Animal Babies**  
1 x 60' or 1 x 90', 2018, HD

The first year in a wild animal's life is the most crucial. Will it get enough nourishment? How will it cope with sibling rivalry or the ever looming risk of predation? Through a series of touching stories, we come face to face with these dangers. The gray seals of Heligoland are born with fur and a thick layer of fat, ready to withstand the bitter wind chill. Getting through the first year may not guarantee a long life, but from here on in the chances of survival grow.

**Doclights/NDR Naturfilm/Terra Mater Factual Studios** 

**Cute Little Killers: The Predators With Pouches**  
1 x 60', 2019, 4K

It was a case of mistaken identity. Explorers confused them for ravenous cats, rats and weasels. But they were something completely unknown...a curious band of marsupials with a taste for blood, bone and meat. Scores of different predators with pouches live all across Australia. The lives of many are at risk. Introducing the numbat, the northern quoll, the dibbler – strange names, strange animals – and the strangers who want to keep them safe.

**Terra Mater Factual Studios** 

**Dragons & Damsels**  
1 x 60', 2019, 4K

More beautiful than butterflies, better fliers than hummingbirds and with behaviour as intriguing and complex as mammals or birds, dragonflies and damselflies are the ultimate insects. Filmed in unprecedented detail, we'll explore how dragon and damselflies hold and defend territories; work together in strict hierarchy; and even predict their prey's movements. A special film depicting some pretty special animals.

**Terra Mater Factual Studios** 

**Dogs In The Land of Lions**  
1 x 60', 2018, HD

In the hilltops of Zimbabwe's Malilangwe Wildlife Reserve, Puzzles and Jigsaw are attempting to raise a family without the help of 'the pack' – a course fraught with dangers for these rare Wild dogs. But against the odds, the pair manage to keep their offspring alive. In need of better shelter the pack move to a hilltop cave where Puzzles soon gives birth to her second litter. Jigsaw must now hunt for everyone. But lions are also on the prowl. One afternoon Jigsaw fails to return, leaving Puzzles all by herself. But she is still unable to leave her newest cubs. The only course of action is to send the older dogs out to hunt. They are inexperienced, without adult supervision they may lose concentration, lose their prey and perhaps even their lives – to the lions. They hunt for more than their family's survival. Failure is not an option.

### Earth: The Nature Of Our Planet

3 x 60', 2018, HD

The nature of our planet – its beauty, complexity and challenges – is bound to the elements. Geological marvels, spectacular weather, mysteries of the plant and animal kingdoms; all inextricably linked and shaped by Air, Land and Water. Each of the three episodes follows the thread of life, entwined with the corresponding element. Life-giving air; the building material that is land; omnipresent water: they all make up the nature of our planet.

### Grasslands: North America's Hidden Wilderness

1 x 60', 2019, 4K

When most people think of North American prairies, they imagine symmetrical lines of corn, canola and wheat all the way to the horizon. But just beyond the croplands lies an unknown wilderness. Before Europeans settled, the Great Plains thundered with the sound of enormous herds of bison and antelope on the move. Every year, half a million sandhill cranes converge on the Platte River in Nebraska. They're heading north along their annual migration route. On the ground, a family of foxes eke out a living amongst the sage brush while Pronghorn antelope learn to navigate the crop fields. The dust of the prairies is being thrown up once more, as bull bison lock horns in a battle for the right to breed. The grizzly bears – driven off the land in the 1800s – have returned. Time is slowly turning back on The Great Plains of America.

Terra Mater Factual Studios/River Road Films 

### Fearless Mr Fox

1 x 60', 2015, HD

The fox ignites passions like no other predator. Vilified as vermin by some and admired for its pluckiness by others, the fox divides public opinion. We find out if England's cities are being overrun by foxes. Are they becoming increasingly brazen? And are they a danger to pets and children? We follow foxes fitted with GPS collars and chart their clandestine forays into the night, finding out how they interact with humans and pets and how they're able to survive.

Windfall Films

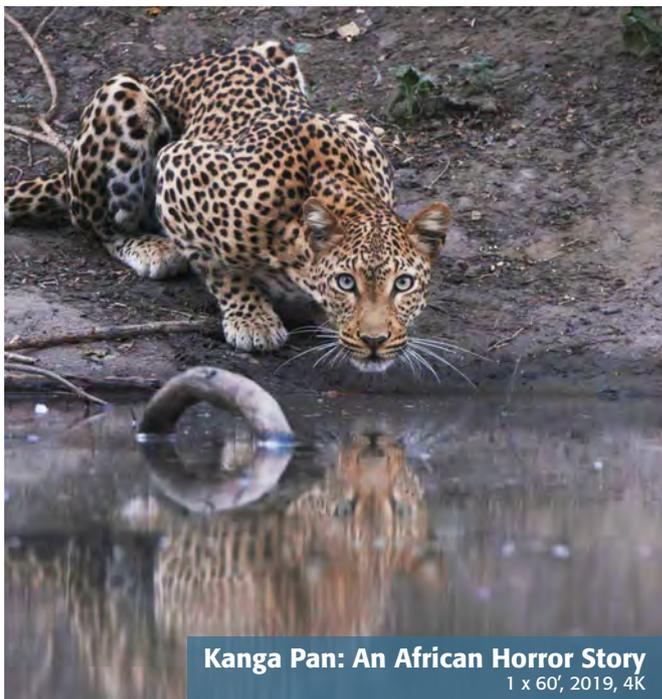

### It's A Wild Christmas

1 x 60', 2018, HD

Wintertime, high up north: glittering frost and rifting snowflakes. It's a time to rest, save energy and take life slow. Or is it? Wintertime in Earth's northern hemisphere simply means one thing – it's summer in the southern half of our planet! From snow-white wallabies in eastern Tasmania to the well-adapted wolverines and grey jays, all of nature celebrates life on a wild, silent Christmas night.

**Kanga Pan: An African Horror Story**  
1 x 60', 2019, 4K

'Kanga Pan: An African Horror Story' is a spine-chilling, wildlife documentary, the first of its kind. A relatively unknown inland waterhole in Mana Pools National Park, Kanga Pan is a gathering point for a melting pot of wildlife species. On the surface, it looks like a peaceful oasis, offering the cooling refreshment of water and bathing. During the dry months of the year, Kanga Pan provides the only source of water for resident wildlife populations for many miles around, making it a hive of activity, where many friendly and not so friendly, animal species meet face to face. But there is a hidden terror lurking in the shadows, a predator tormenting as a multitude of wildlife species to quench its thirst. Who is the killer on the loose? Who is terrorising the Pan? An investigation needs to be undertaken.

**Nigel Marven: Animal Adventure Collection**  
15 x 60', 2004-2007, SD/HD

Join Nigel Marven on his adventures with a collection of his most famous wildlife specials! Visit Penguins in the beautiful sub-Antarctic, see how we can harness the power of venom for good and travel with Nigel to the Falkland islands to meet an array of wildlife. It doesn't end there, follow Nigel on an Arctic adventure to visit newborn Polar bears or become a detective as we find out how plants and animals can help us solve crimes!

**Nigel Marven Productions**

**Namibia Diaries**  
8 x 30', 2018, 4K

In this series, natural and cultural aspects of Namibia are documented thoroughly. From Namib, the oldest desert on the planet to the Great Fish River, the worlds second largest canyon, some of the planets most dramatic landscapes are covered in this series. Rare species such as wild dogs and pangolins are documented as well as the Himba and the ancient Bushman (San) who have been living in this region for at least 30,000 years.

**BBA Broadband Films**

**A Life Among Monkeys**  
1 x 60', 2018, 4K

A lifelong study by one pioneering scientist has opened our eyes to the secrets of primate society. Now, the story of his discoveries and of this unique group of monkeys can be told in full. 'A Life Among Monkeys' tells the story of Smithsonian primatologist, Dr Wolfgang Dittus, through the unfolding narrative of the lives of the toque macaques monkeys, living among the spectacular ruins of an ancient temple in the heart of the Sri Lankan jungle. We encounter a complex hierarchy, inhabited by cute but naïve newborns, politically savvy matriarchs and warring males, captured in rich archive film and contemporary 4K footage. 'A Life Among Monkeys' combines immersive natural history storytelling with a fascinating journey of scientific discovery.

### Remarkable Rwanda

1 x 60', 2018, HD

Having escaped the terrible ghosts of the past and redressed its wounds, Rwanda has long been a peaceful and safe country. Known specifically for the last remaining mountain gorillas, Rwanda offers a lot more. A paradise in the midst of Africa, with volcanoes, lakes, rivers and savannas, which shape both the nature and the social life. From the Nyungwe Rainforest to the Akagera National Park, from lions to chimps, 'Remarkable Rwanda' shows all aspects of this beautiful country.

**BBA Broadband Films**

### Saving Giants

1 x 60' or 1 x 88', 2018, 4K

At the southernmost tip of Africa, the world's preeminent giraffe researcher, Dr. Francois Deacon, is embarking on the most ambitious project of his career and perhaps the most ambitious project in giraffe conservation to date. On the rugged and untamed plains of South Africa's Rooipoort Nature Reserve, Dr. Deacon will set out to capture and GPS collar 20 giraffes, a project that will enable him to study these giraffes' every move and behaviour over the next year. Joining him on this wild expedition are renowned researchers from various parts of the world, each with unique scientific backgrounds. The team's mission is to address various scientific questions about giraffes that have yet to be answered. Each biologist, with their own goals and objectives, will provide one piece of the puzzle of information needed to save giraffes from extinction.

**Iniosante, Inc.**

### Seasons In The Wild

2 x 60', 2019, HD

When one part of the planet stirs from its wintery slumber, and the other winds down after a busy summer, nature gets ready for change! By Spring the air has lost its winter chill. Torpor and hibernation are two of nature's most ingenious ways to cope with changes in climate, food supply and energy. Groundhogs make their way through the last snows; frogs execute their first careful moves and brown bears remove fallen branches from the entrances to their dens to clear the way for the young. Most mammals gorge on dwindling supplies, storing fat to get them through the winter months as they settle in their dens for the big sleep. But how do they know when it's time to wake up? Melting snows, the flush of spring, summer sun or darkening days; the world may change, but nature has devised ingenious ways to thrive whatever the season.

**Terra Mater Factual Studios**

### Rottneest Island: Kingdom Of The Quokka

2 x 60', 2018, 4K

Islands worldwide are grand experiments in nature, with their isolation creating unique conditions for animals to diverge from the norm. On the far west of the Australian continent lies Rottneest Island where one of the world's 'happiest', yet most vulnerable marsupials the Quokka thrives. How do they survive here in such inhospitable conditions and nowhere else? In a world first, the entire life cycle of the Quokka will be filmed using special natural history filming techniques to expose the secrets of its survival mechanisms.

**Sea Dog TV International**

**The Secret Lives Of Owls**

2 x 60', 2018, HD

Owls – we're captivated by their beauty and intrigued by their air of mystery. This stunning series uncovers their secret life as never seen before, using a special camera rig to follow families of owls in a wild corner of rural Essex, through winter, spring and summer. There's joy and tragedy, as they battle starvation, mate, and raise their young. Finally, we follow the baby owls as they transform from cute bundles of fluff into fully-fledged adults, one clumsy leap at a time.

**Windfall Films**

**Sixteen Legs**

1 x 60', 2018, 4K

Giant prehistoric spiders the size of dinner plates seek kinky love in the dark. As the world rapidly descends into the next period of global mass extinction, a message of hope comes from an unlikely hero: a creature, often unfairly reviled, that has survived prior mass extinctions and climatic change in a magical ecosystem hidden beneath the World Heritage mountains of one of the world's last great wildernesses. Award-winning cinematography documents the 25th anniversary of scientific research into animals that outlasted the dinosaurs, survived the splitting of the continents and have endured the entirety of human civilisation in Australia's deepest caves. Journey through the visually stunning wilderness of Tasmania to an underworld that few people have seen and celebrate the wonder of an ecosystem that has preceded us and may still outlast us.

**Bookend Enterprises Pty. Ltd**

**Sex, Lies And Butterflies**

1 x 60', 2017, 4K

Moths and butterflies have been flying around the planet for over 130 million years. Today, an estimated 28,000 species inhabit the globe. We follow their amazing cycle from egg to caterpillar, to chrysalis, and onto the miraculous emergence of a beautiful winged creature. Moths, butterflies and caterpillars seem barely more than little packets of protein, but they have evolved a fascinating range of disguises and tactics to trick their predators. In South America, a butterfly has struck a deal with local ants. The ants are 'baby-sitting' the butterfly's larvae; in return, the larvae are feeding the ants with a special secretion. Scientists are beginning to understand how butterflies and moths see, how they avoid their predators, and why their flight technique is so different from that of birds.

**Spider House**

1 x 89', 2014, HD

Ever wondered what spiders really get up to in your home? In this special Alice Roberts overcomes her arachnophobia to enter a spider-filled house where an astonishing drama unfolds within its walls. Inside she meets entomologist, Tim Cockerill, who loves spiders and quickly immerses Alice in the wonders of web building, the secrets of fly-catching and the dangerous spider-eat-spider world they inhabit.

**Windfall Films**

### Untamed Romania

1 x 90', 2018, 4K

'Untamed Romania' celebrates Romania's astounding natural beauty and sheer diversity of wild animals. Vast mountains, ancient forests and expansive wetlands provide undisturbed habitats to many of the continent's iconic creatures. From the forested slopes of the Carpathian Mountains where bears, wolves and lynx roam free, to the wind blown waters of the Danube Delta where pelicans take to the skies. We reveal how the country's creatures adapt to the varying seasons, and how forests in particular are crucial to their existence. Romania's forests and wetlands are some of the last strongholds of Europe's wildlife. However, the last of the continent's true wilderness is in danger. Illegal logging slowly erodes the ancient forests. Unlicensed hunting and fishing could devastate entire species, destroying the delicate relationships they share with their environment forever.

**Off the Fence/Auchan Romania S.A.**

### Whale Wisdom

1 x 60', 2018, 4K

We know that whales share knowledge amongst themselves. Now, it seems they communicate on a much more sophisticated level than previously anticipated. Together with renowned film maker Rick Rosenthal we embark on a wonderful journey: to make first contact with a new mammal culture – the culture of the whales.

### Tall & Tiny: Nature's Extremes

1 x 60', 2018, HD

Tremendously tall or ridiculously small. Meet giant birds that can't fly and even bigger mammals that defy gravity. There is the brush turkey with its outrageously large feet – and the obscure – giant African bullfrogs challenging each other for their offspring! On mass, termites become fierce defenders, schools of anchovies become impenetrable and we find out that much on Earth that appears gigantic is made up or nourished by the smallest of the small.

**Terra Mater Factual Studios**

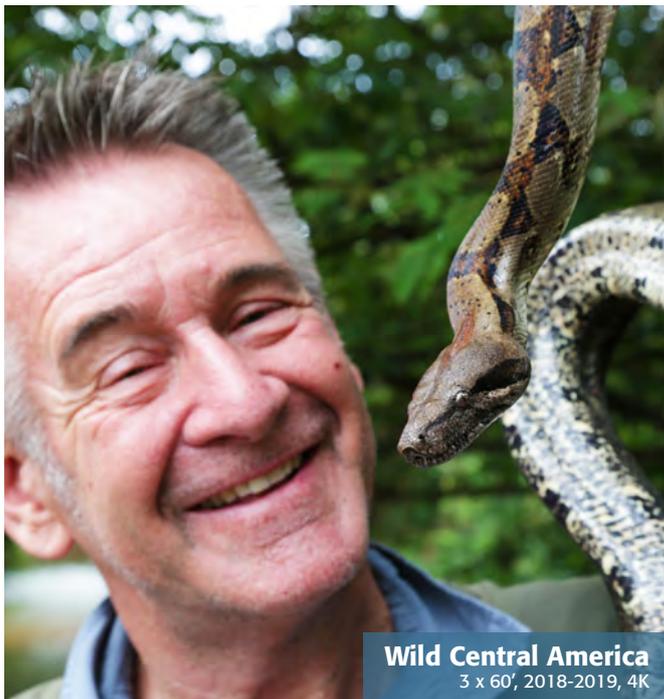

### The Upside Down Tree

1 x 60', 2018, HD

The African Baobab is one of the largest living things in the world, an icon of the African landscape, instantly recognisable, mysterious and intriguing. It is the world's biggest flowering plant and the largest succulent plant on earth, associated with myths and legends. This is the tree that many African people believe to be the home of ancestral spirits. It is important to the indigenous people as a source of food, fibre and medicine and is now being hailed as an African 'superfruit' and as a 'dryland crop for the future'. This film is the fascinating history and overview of the remarkable Baobab.

**Camera Africa**

**Wild Central America**  
3 x 60', 2018-2019, 4K

Join Wildlife adventurer Nigel Marven as he travels along the narrow isthmus between the North and South America finding extraordinary wildlife and heart-warming stories every step of the way. In the style of the recent and successful Wild Philippines series; Nigel reveals the breath-taking landscapes of the region, discovers many of the extraordinary animals that live in the Central America and introduces us to the people dedicated to protecting their precious wildlife. This is a world that was once dominated by the great Mayan civilisation, who ruled in each country we visit; Guatemala, Honduras and Costa Rica. Here we'll uncover their legacy and reveal many of the creatures they worshipped; from crocodiles and feathered serpents to the mighty jaguar!

### Wonders of Africa: What A Difference A Day Makes!

1 x 60', 2018, HD

Throughout the whole night, a male ostrich has been guarding his most-prized treasure: a nest full of eggs – the next generation. Will the chicks manage to hack their way out of the thick-walled eggs? Freezing cold mornings and even snow – in Africa? Welcome to Mount Kenya! At over 5,199 metres, it's the second highest mountain in Africa. To survive here you need a thick skin – and the fur of the cheeky little rock dassies is thick enough to endure the coldest winter. Three male lions scan a thirsty buffalo herd in South Africa's Kruger National Park. They hunt down a buffalo calf but the predators cannot yet feast in peace. The calf's mother seeks revenge. A long, exhausting day in Africa draws to a close. Under a dome of twinkling stars, the day shift tries to rest. Tomorrow will bring life, death, failure and success all over again.

Terra Mater Factual Studios 

### The Woman Who Loves Giraffes

1 x 60' or 1 x 83', 2019, HD

In 1956, four years before Jane Goodall ventured into the world of chimpanzees and seven years before Dian Fossey left to work with mountain gorillas, 23-year-old, Anne Innis Dagg, travelled to South Africa becoming the first person in the world to study animal behaviour in the wild. Returning home a year later armed with ground-breaking research, the barriers Anne faced as a female scientist proved hard to overcome and in 1972 Anne transformed into a feminist activist. Anne was missing from the world of giraffes until 2010 when she was headhunted by giraffologists and not just brought back into the fold but also finally celebrated for her work. Now, Anne takes us on her first expedition back to Africa to retrace her footsteps. 'The Woman Who Loves Giraffes' offers an intimate look into Anne's life as a young woman, juxtaposed with a first-hand look at the devastating reality that giraffes are facing today.

Free Spirit Films

### The Wonder Of Dogs

3 x 60', 2013, HD

No other land mammal displays such dazzling diversity as man's best friend. It's hard to believe that a great dane and a chihuahua belong to the same species. 'The Wonder of Dogs' celebrates and interrogates the dog in all its spectacularly different and unlikely forms. From ancient predator to household pet, the evolution of dogs is arguably the greatest success story in the animal kingdom.

Windfall Films

### Adolf Island

1 x 60', 2018, 4K

In 1945, British investigators arrive on the British Channel Islands and discover evidence of terrible crimes committed by the SS. Linked to Dachau and Neuengamme concentration camps, the crimes committed here have remained unsolved. Now, 70 years later, forensic investigator Caroline Sturdy Colls sets out to reveal the truth about what happened on Adolf Island.

**SNAP TV Limited/Smithsonian Networks**

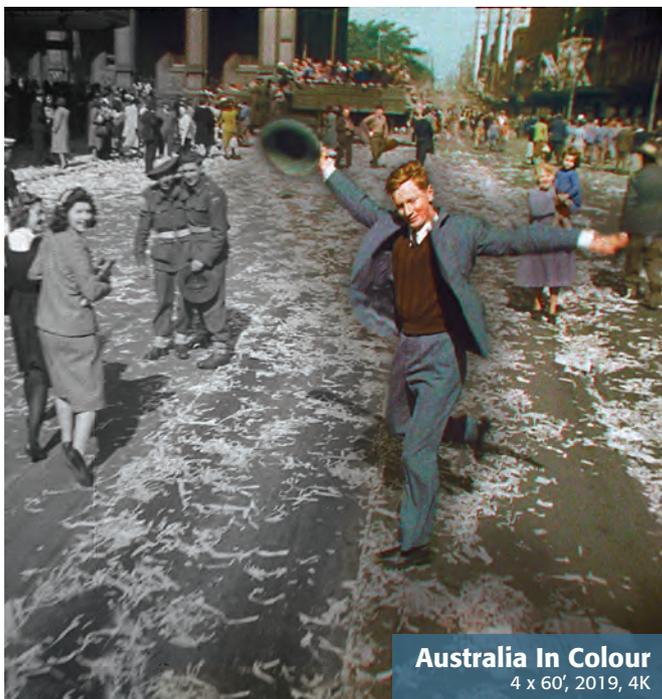

### America's Hidden Stories

8 x 60', 2018, 4K

'America's Hidden Stories' takes a new approach to the past. Iconic periods in history are investigated as 'cold cases' or crime scenes. Researchers gather clues, dig through old files, deploy new technology, hunt for eyewitnesses and question conventional wisdom. Using history experts to recreate the past, researchers turn up new information, solve centuries-old mysteries, and, on occasion, flip conventional wisdom upside down. From discovering the long-lost burial site of the Salem Witches, to the secret plan by President Lincoln's War Department to murder rebel leader Jeff Davis, to the hidden story of how the influenza epidemic of 1918 may have helped cause World War II. America's Hidden Stories will pull the veil from events we thought we knew and, in doing so, reveal new interpretations and factual evidence about history that we thought we knew.

**Lone Wolf Documentary Group/Smithsonian Networks**

### Australia In Colour

4 x 60', 2019, 4K

This is the history of Australia told via a collection of cinematic moments brought to life for the first time in stunning colour. Carefully curated familiar footage, touching home movies and never-before-seen archival material chart how Australia developed as a nation. From the oldest surviving footage captured in 1896 in Sydney's Prince Alfred Park, to the beginning of colour television in the 1970s, each sequence is restored and colourised. Showing the foundation of modern Australia, we relive a time when Ned Kelly was the first hero of the silver screen. We see some of the quarter of a million men who fought in World War I. We take a look at the evolving role of women in the workforce, their struggle for equal rights, equal pay, the right to drink in public bars and the right to not wear pantaloons when swimming.

**Arrow Media/Stranger Than Fiction Films**

### America In Color

11 x 60', 2017-2018, 4K

Witness defining moments of early 20th century America like never before: in dramatic colour. Roam the untamed Wild West, visit burgeoning cities, and enter the dream factory of Hollywood. Follow larger-than-life figures who drove America's industrial transformation, turned crime into an organized business, and built political dynasties. Using cutting-edge digital technology, we bring our young country's most seminal landmarks, people and moments to vibrant life.

**New Series**

### The Battle For Britain's Heroes

1 x 60', 2018, HD

All countries have an official version of their history. It is a story built around grand achievements, victories and successes. However, around the world people are now challenging this by raising, often ignored, uncomfortable truths such as involvement with slavery, racism or colonialism. This is history at its most heated. Now the debate has come to Britain and Journalist Afua Hirsch explores why people get so upset when she raises what to her are simple facts of our past.

### Battle Of Little Bighorn

1 x 60', 2018, 4K

Propelled by mystery, the Battle of Little Bighorn is perhaps best known by a single famous image: a long-haired General, clad in buckskin, fighting an army of Native Americans on the top of a hill. But in all likelihood, the beloved idea at the root of the battle's fame probably didn't happen at all. This documentary explores how a single afternoon in 1876 shaped the myth of a nation in unexpected ways.

**The Biscuit Factory/Smithsonian Networks**

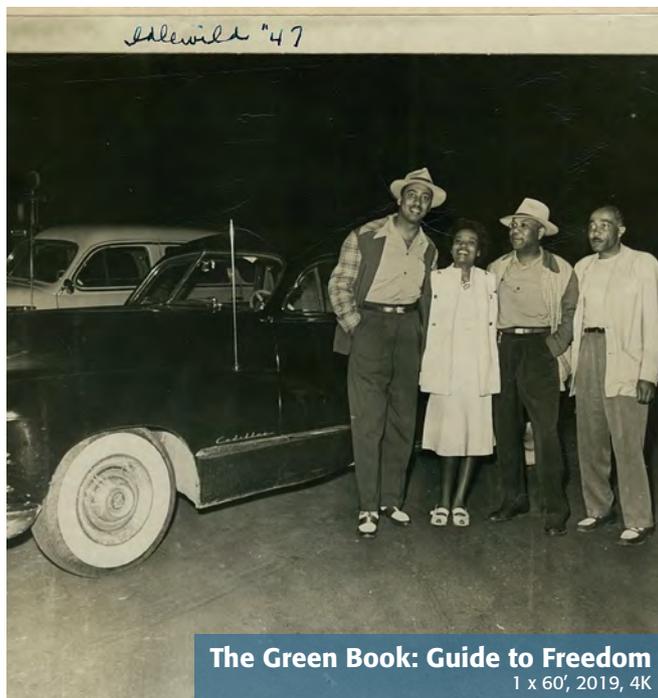

### BESA: The Promise

1 x 86', 2009, HD

Follow the journeys of two men as they reveal Albania's secret heroism in WWII. Norman Gershman, a renowned Jewish-American photographer determined to document first-person accounts of the Albanian Muslims who rescued Jews during the Holocaust and Rexhep Hoxha, a Muslim-Albanian who must fulfill the promise made to a Jewish family his father rescued during the Holocaust and return to them a set of Hebrew books they left behind.

### The Green Book: Guide to Freedom

1 x 60', 2019, 4K

In the 1930s, a black postal worker from Harlem named Victor Green published a book that would become part travel guide and part survival guide. The Negro Motorist Green Book helped African-Americans navigate safe passage well into the 1960s, and also served as a catalyst for new businesses. Explore some of the segregated nation's safe havens and notorious "sundown towns" and witness stories of struggle and indignity as well as opportunity and innovation in this documentary, 'The Green Book: Guide to Freedom'.

**Impossible Factual/Smithsonian Networks**

### Flying Tigers

4 x 60', 2015, HD

Tigers do more than just crouch in China. The Flying Tigers were US airmen who flew into China during the Second World War. Some say that their presence in the Far East was the final straw that led to Japan's decision to attack Pearl Harbor. For six months, from December 1941 to June 1942, they provided a crucial last ditch aerial defence of China. Only fragments of their story have been told - until now.

**LIC China**

**Hell Below**  
12 x 60', 2016-2018, HD

'Hell Below' charts the stealth game of subsea warfare, tracking the dramatic narrative from contact to attack of the greatest submarine patrols of WWII and the Cold War. From the rise of the Wolfpack to the drive for victory in the Pacific to the Allies' strikes against Axis might and the cat and mouse games between the NATO and Soviet block. Expert analysis and stock footage are woven with narrative driven re-enactments to place the characters at the heart of the action.

**JFK: The Last Speech**  
1 x 60', 2018, HD

Of President John F. Kennedy, many stories have been told. Few are less known or more revealing than his friendship with America's most celebrated poet. Yet it was Robert Frost that Kennedy made the subject of one of his most famous speeches—just weeks before his assassination. 'JFK: The Last Speech' explores the dramatic relationship between these two seminal Americans, reaching its tragic climax in a surprising encounter with Soviet Premier Nikita Khrushchev at the height of the Cold War. At its centre is an extraordinary speech about poetry and power that inspires a group of college classmates to alter the course of their lives.

**Northern Light Productions**

**Hitler's Last Stand**  
4 x 60', 2018, HD

In the days and weeks after June 6, 1944 allied soldiers pour into France via the beaches of Normandy. But after the surprise of the D-Day landings and the initial advances, Nazi forces fall back and dig in to keep an unrelenting grip on naval bases, citadels and fortresses of occupied Europe, planning to drive the Allies back into the North Atlantic and reassert German domination. It will take eleven months of hard fighting to break the Nazi stranglehold to free the rest of Europe. D-Day was a battle, the Allies still need to win the War. 'Hitler's Last Stand' tells the stories of the desperate battles that were waged.

**Parallax Film Productions**

**Leaders of WWII: The Early Years**  
1 x 60', 2018, HD

We know the leader's of the Second World War: Charles De Gaulle, Adolf Hitler, and Winston Churchill, but do we know the stories of these men 20 years earlier, in the First World War? Courageous Soldiers, Cowards, or Hotheads? Who led the way in the mud of the trenches? Who committed feats in Battles? Who escaped? For the first time ever, discover the incredible history of these leaders of the Second World War in the Hell that was 1914-1918.

### Legendary Megastructures

3 x 60', 2019, HD

Take a trip to France to discover the construction secrets to some of its most legendary megastructures. Learn how Napoleon I instigated many constructions that are today anchored in Parisian Landscape. How and why the Christian Church built the Sanctuary of our Lady of Lourdes and how Napoleon III along with urban planner Baron Haussmann modernised Paris into the city we know today.

**La Famiglia**

### October 1949: Parade Of The Walking Giant

1 x 60', 2010, HD

On October 1, 1949, Mao Zedong held a victory celebration parade in Tian'anmen Square and announced to the world the creation of a People's Republic of China. This film is a definitive account of how Mao orchestrated and carried out this spectacular parade all the while facing threats of an ongoing civil war. Filmmaker Peter Du Cane unearths rare archive footage and pieces together the remainder of this historic speech and makes it whole for the first time ever.

**LIC China**

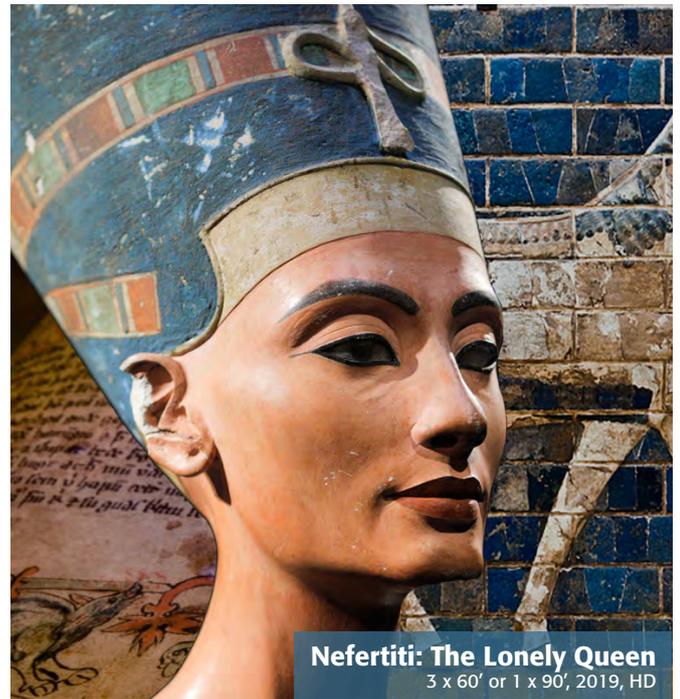

### Revolution In Colour

2 x 60' or 1 x 90', 2015, HD

'Revolution in Colour' tells the story of Ireland's struggle for independence during the early 20th Century, not in black and white but in colour. The newsreel, primarily from the British Pathé archive with additional footage from the British Film Institute and the Irish Film Archive, has been painstakingly restored and colourised. The end result creates a powerful emotional connection with the people, the personalities, and the past bringing Irish history to life.

**Zampano Productions/British Pathé**

### Nefertiti: The Lonely Queen

3 x 60' or 1 x 90', 2019, HD

'Nefertiti: The Lonely Queen' looks at the status of stolen cultural treasures. Voices demanding repatriation are getting stronger - the resistance of the former Colonial powers holding onto these treasures is growing. Museum directors talk about why their institution is the rightful owner of certain objects. People demanding repatriation explain the necessity of guarding their cultural heritage in an accessible place in the home country. Among other stories we look at the current situation in the Middle East and how that affects the cultural heritage of certain areas. The invasion of Iraq and the revolutions in Egypt and in Libya led to mayhem in the cultural heritage domain: we have seen many looted museums and looted archaeological sites. We see how the Islamic State is selling looting licenses to entrepreneurs and professional art thieves.

**Markell Production/Heretic/Films Transit**

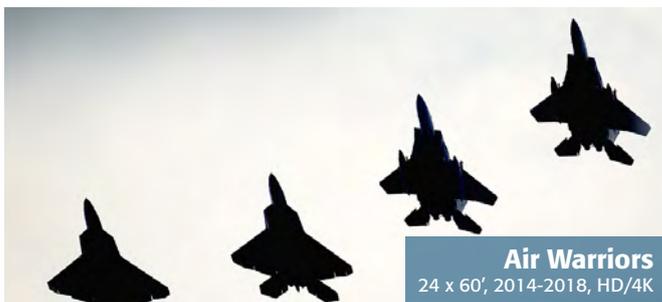

### Victoria And Albert: The Wedding

2 x 60' or 1 x 90', 2018, HD

Historian Lucy Worsley oversees a glorious re-imagining of the wedding of Queen Victoria and Prince Albert. Aided by experts, Lucy painstakingly recreates elements of the wedding celebrations, scouring history books, archives, newspapers and even Victoria's very own diaries for details. Each element of the wedding will be carefully researched, remade by hand, and finally put to use in a dramatic re-staging of the big day itself.

**BBC Studios Unscripted Production/BBC/PBS**

### Air Warriors

24 x 60', 2014-2018, HD/4K

Back for an amazing seventh series 'Air Warriors' takes you on a journey to discover World War II's most legendary fighter, the world's first "invisible" plane and the Swiss Army knife of military aircraft. These are just some of the world's most iconic planes -past and present- that have pushed the boundaries of aviation, gravity, and warfare. Discover the inside stories of the F6F Hellcat, the F-22 Raptor, the OV-10 Bronco, and many more.

### Apollo's Moon Shot

6 x 60', 2018, 4K

When President Kennedy challenged NASA to reach for the moon in 1961, it had all of fifteen minutes of space flight experience. By 1969, Neil Armstrong's boot print was in the moon dust. In between are extraordinary tales of politics, engineering, ego, tragedy, and triumph. They are told by astronauts, historians, Smithsonian experts, and one-of-a-kind artifacts. This series sheds new light on one of the most compelling chapters of the American storybook: Project Apollo.

Smithsonian Networks

### The Bit Player

1 x 89', 2019, HD

In a blockbuster paper in 1948, Claude Shannon introduced the notion of a "bit" and laid the foundation for the information age. His ideas ripple through nearly every aspect of modern life, influencing such diverse fields as communication, linguistics, genetics, computing, cryptography, neuroscience, artificial intelligence and cosmology. But when interviewed in the 1980s, Shannon was more interested in showing off the gadgets he'd constructed - juggling robots, a Rubik's Cube solving machine, a wearable computer to win at roulette, a unicycle without pedals, a flame-throwing trumpet - than relishing the past. Mixing contemporary interviews, archival film, animation and dialogue drawn from interviews conducted with Shannon himself, 'The Bit Player' tells the story of an overlooked genius who revolutionized the world, but never lost his childlike curiosity.

### Mystery Of The Celtic Tomb

1 x 60', 2018, 4K

Where did the Celts come from? In the heart of the Alps remarkable evidence of their culture has been found – perfectly preserved inside sealed salt mines and in a gigantic cemetery. Inside a 2,400 year old tomb mysterious remains are recovered: a woman and two giants of men. A shaman and her entourage? Relatives or sacrifices? A team of scientists try to unlock this secret; it may be the first real evidence of mystical rites from the dawn of the Celts.

**Terra Mater Factual Studios**

**The Sun: Inferno In The Sky**  
1 x 60', 2018, 4K

In 2012, a massive eruption on the sun hurls a colossal cloud of solar matter into space. Fortunately, the Earth is not in the direct path of this solar ejection. But it's only a matter of time before a violent solar storm hits us. When these clouds of charged matter reach our planet, they can wreak havoc in electrical systems. Previous sunstorms have resulted in large-scale power outages and the total loss of satellites. An important indicator for solar activity is sunspots – darker areas that are a little cooler than the rest of the sun's surface. Scientists in Austria monitor sunspots and send their observations to the World Data Centre of the Sunspot Index, where others are trying to predict the sun's behaviour so they can forecast space weather. 'The Sun: Inferno in the Sky', presents the latest developments in solar science.

**Terra Mater Factual Studios**

**Rising Tide**  
4 x 60', 2019, HD

In this series, photographer Kadir van Lohuizen investigates the consequences of rising sea levels. As we travel the world, we find the effect of this rise already being felt. Water touches on some of the biggest issues facing our planet today: climate change, energy supply, poverty, population, agriculture, urbanisation and migration. The result is a series that paints a confrontational image of the near future in a stirring way.

**Witfilm**

**The Most Unknown**  
1 x 90', 2018, HD

'The Most Unknown' is an epic documentary film that sends nine scientists to extraordinary parts of the world to uncover unexpected answers to some of humanity's biggest questions. How did life begin? What is time? What is consciousness? How much do we really know? By introducing researchers from diverse backgrounds for the first time, then dropping them into new, immersive field work they previously had not tackled, the film pushes the boundaries of how science storytelling is approached.

**A Motherboard Production**

**Target Zero: Preventing HIV Transmission**  
1 x 60', 2017, 4K

'Target Zero: Preventing HIV Transmission' shows the challenge and emotional complexity of the fight to control HIV infection. It features real-life patient stories, state of the art molecular animations, and interviews with medical professionals and scientists. These accounts illuminate the history of the HIV epidemic and reveal the ongoing need for compassionate, patient-centered care and a true understanding of the science behind the treatments.

**MedCine LLC**

**V-Day: Volcanic Planet**  
1 x 120', 2018, 4K

'V-Day: Volcanic Planet' asks: what would happen if all of the world's volcanoes erupted on a single day? Join scientists around the globe as they deploy the latest technology to understand and predict volcanic behaviour. Spectacular footage of past and current eruptions, puts us right in the heart of volcanoes. Then, by speeding up the action into a single day, we get a breathtaking new perspective on the remarkable forces that have shaped our planet for millions of years.

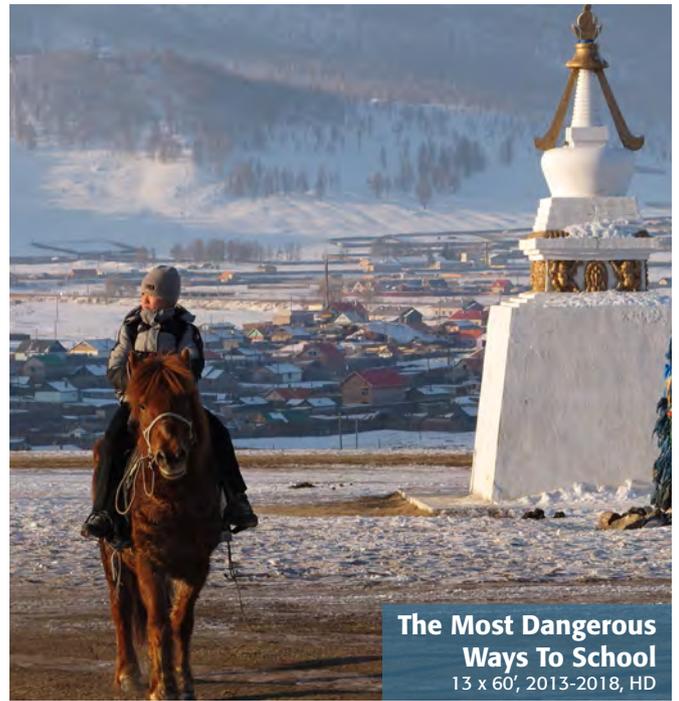

**Pioneer Productions/Smithsonian Networks**

**The Gorals: Highlanders  
Of Carpathia**  
1 x 60', 2018, 4K

This film showcases the lives of Polish highlanders who perform old professions. These are people whose characters are shaped when confronted with nature and inaccessible mountains. Around the mountains, everything changes and they stand unshaken. Is the culture of Carpathian highlanders sustainable, or could these be the final times for these people living this lifestyle in the mountains, and not only as folklore in the museums of folk art?

**Inbornmedia Production**

**The Most Dangerous  
Ways To School**  
13 x 60', 2013-2018, HD

For most, getting to school is just a routine; for these children, it can be a brutal challenge. The difficult, often dangerous ways to school, dramatically shows just what some people are prepared to overcome in the pursuit of a better life. In the midst of the breathtaking nature on one side and the challenges that face the children on the other, it becomes uniquely clear how important the opportunity of education is for so many people in the world. We accompany the school children from some of the world's most remote locations, beginning with their living environment and continuing on their way to school until they reach their destination. We take viewers on an adventure to some almost impossible to reach places, where the students navigate the narrow path between survival and the thirst for knowledge. Series three features Bolivia, Vietnam and the Philippines.

**Maximus Films**

**On My Way Out: The Secret  
Life Of Nani And Popi**  
1 x 60', 2017, HD

Roman (Popi) and Ruth (Nani) Blank are Holocaust survivors, who have been married for 65 years, but at age 95, Roman reveals a secret to his family that tests their seemingly invincible union - Roman is gay and Ruth has been aware for the majority of their married lives. Told through the lens of their grandchildren, this award-winning documentary is filled with heart wrenchingly raw moments as captured in real time (cinema verite style) while at the same time, including lighthearted beats of humour. Following the film's premiere at TIFF, The Canadian Globe and Mail awarded it 4 out of 4 stars, writing "The documentary is beautifully and skillfully sparse. You want more of this family." OMWO chronicles their unique and unconventional love story that brings to light universal themes that touch on what it means to be human.

**Sonny Boy Media LLC and Alevy Productions**

**Planet School**  
3 x 60', 2018, HD

In the series 'Planet School', six pupils describe the most special features of their schools. Each of the six episodes covers an entire school day and makes it possible to experience the lessons, teaching concept, as well as the feelings and thoughts of the pupils. What do the children love about their schools? What do they dislike? How do they spend recess and how do they make friends? How do they handle exams and challenges?

**Maximus Films**

### Remembering Papua New Guinea

1 x 60', 2019, HD

This documentary celebrates the rich, cultural and environmental tapestry which makes up Papua New Guinea. Indeed, according to Sacred Ecology in the Pacific Islands, the 'ethnosphere' and the biosphere are a single integrated whole. The conservation value of the country's natural and cultural assets is ultimately juxtaposed with the fast-changing reality exacerbated by illicit deforestation and dodgy developments.

**Alessio Bariviera**

### Yasuni Man

1 x 86', 2018, HD

In the depths of South America, where the Andes, the Amazon and the Equator collide, a wilderness exists that was home to some of the last remaining uncontacted people on Earth. The forest in which they live may claim our planet's highest biodiversity. A place where mammals, birds, plants and amphibians reach peak diversity, together. Because of its biological diversity and cultural significance, the forest was designated a UNESCO Man and Biosphere Reserve and Ecuador's largest national park. It is now known as Yasuni the Man and Biosphere Reserve. In 2017, Yasuni and the Waorani hung on the edge of collapse. 'Yasuni Man', a documentary feature, tells the story of the conflict in Yasuni that has pitted biodiversity and human rights against extractive industries and human consumption.

**Pollywog Productions**

### St Paul's At Christmas

1 x 60', 2018, HD

Go behind the scenes at St Paul's Cathedral for their most magical time of year – Christmas. What's it like for the people who make the magic happen and how do they cater for the 45,000 visitors that come through the cathedral's doors during the festive season? St Paul's Cathedral is known as the Nation's Church and has become an iconic symbol of London. Every Christmas, the cathedral puts on a magnificent array of special services and concerts from the Advent Procession to carol concerts, Midnight Mass on Christmas Eve and on Christmas Day itself. We're there to watch as the spectacular events of the festive season unfold and we go behind the scenes as the Christmas trees are winched into place and the golden copes are repaired.

**Films of Record/Zinc Media**

### Syriopolis

1 x 60', 2018, HD

Comedian and Journalist Omar Hamdi travels to Greece to find out what has happened three years after the largest movement of people since the Second World War. Now that the TV cameras have left the Greek beaches where thousands of Syrian refugees were arriving daily, where have they all ended up? Is Greece, and Europe, at breaking point? Hamdi blows the lid off a refugee crisis that's far from finished and uncovers the Greece they didn't want you to see...

In an exhilarating mix of aviation adventure and detective work, presenter James Crawford takes to the skies to explore Scotland's cities, coasts and countryside. Using rare archive from aerial photography and stunning graphics, places that exist only as photographs are brought back to life. This archive is a unique record of a century of change and shows how life on the ground has been transformed. Together, they tell the story of the making of a modern nation.

### The Travel Bug

65 x 60', 2010-2016, HD

Series six explores Asia, Europe and the Pacific. Taking you in search of new and exciting experiences all starting on the South East Coast of Australia. We then head to Korea and the north of Japan in winter, before making our way to the paradise of Tahiti. It's then off to the Mediterranean and some of the most remarkable sites across Greece, Crete and Malta. This series combines action, food, culture and history that will inspire you to pack your own bags for a holiday!

**The Rusty Cage**

### Wings Over Grand Canyon

1 x 60', 2008, HD

Explore the seventh natural wonder of the world like never before! 'Wings Over Grand Canyon' is a stunning high definition aerial adventure spanning three American states, three National Parks, two National Recreation Areas, two amazing lakes and 1,500 miles. We soar high above the National Parks, over breathtaking landscapes, and into hidden, magical canyons. While over five million people visit the Grand Canyon National Park each year, they only see a fraction. Few realise that the canyon landscapes extend in both directions for many hundreds of miles and offer a stunning array of awe-inspiring vistas. This programme shows nature at her most powerful and most beautiful, and 'Wings Over Grand Canyon' presents an exhilarating experience for all and around every corner provides something totally unexpected.

### Behind Bars: The World's Toughest Prisons

6 x 60', 2016, HD

These are six of the toughest prisons in the world. Prisons so tough, even gang bosses and killers learn the meaning of fear. Across four continents, six different prisons, 'Behind Bars: The World's Toughest Prisons' takes us beyond the gates, walls, barred windows and cells into an unknown world, a world we know exists, but a world nobody wants to think about. Rules and rigid routine in some, total anarchy in others, making it hell on earth for every inmate. Each episode delves into the world of prisoners: newcomers who spend their first night in jail, mothers who have to raise their children behind bars, felons waiting for a court to decide their fate. Their lives are always in someone else's hands.

Maximus Films

### The Guy With The Knife

1 x 90', 2015, HD

In 1991, Texan Jon Buice beat a gay man to death. Buice was 17; he was sentenced to 45 years in prison. He now claims he is reformed. In 2011, the parole board voted unanimously to release him, but after an appeal from the victim's mother, parole was rescinded. This fascinating story explores the complex challenge of balancing punishment with rewarding reformation, and administering justice in the aftermath of the most heinous crimes.

OUTtv

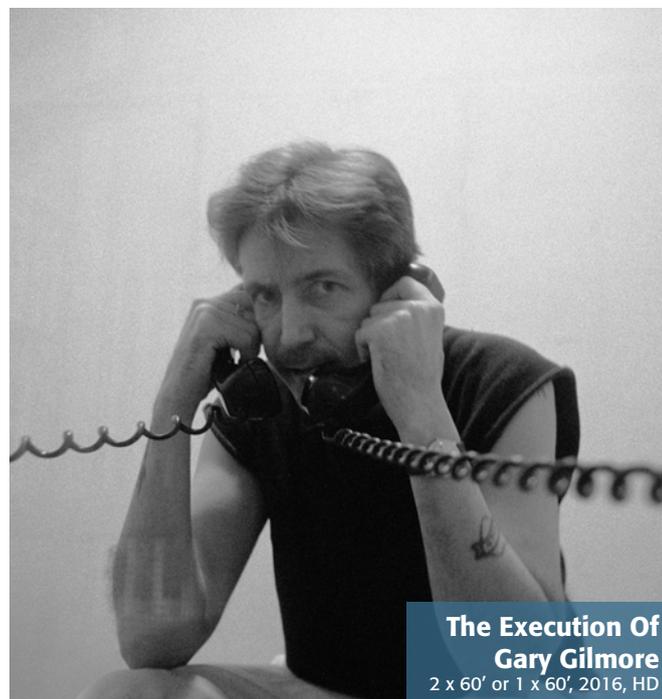

### Chain Gang Girls

1 x 90' & 1 x 60', 2009, HD

Phoenix, Arizona. Home to America's most notorious sheriff, Joe Arpaio. Serving time in Maricopa County is brutal. Inmates do their time outside in military surplus tents, 365 days a year. And the sheriffs taken away all privileges: no television, no coffee, no cigarettes. He's even put women on a chain gang to teach them discipline and deter crime. It's a remarkable story, and a portrait of a unique piece of 21st century America.

Hoff Productions

### The Execution Of Gary Gilmore

2 x 60' or 1 x 60', 2016, HD

In January 1977, Gary Gilmore spoke his last words, 'let's do it', and was executed by firing squad. That simple act reinstated the death penalty in the US after a ten-year moratorium. The floodgates opened, and since then over 1,000 state sponsored executions have taken place in the US. Exclusive footage in this film sparks the Gilmore saga to life - re-telling a crucial story of American justice, and asking, what happens next? Gilmore, who was convicted of murdering a gas-station attendant and a motel clerk without motive, wanted to be executed. He refused to appeal his verdict and insisted that he wanted to die. Through never-before-seen material, we re-tell a crucial story of American justice, and also revisit both sides of the contentious capital punishment debate. How did we get to where we are and what is next?

WS Productions, Inc./1895 Films

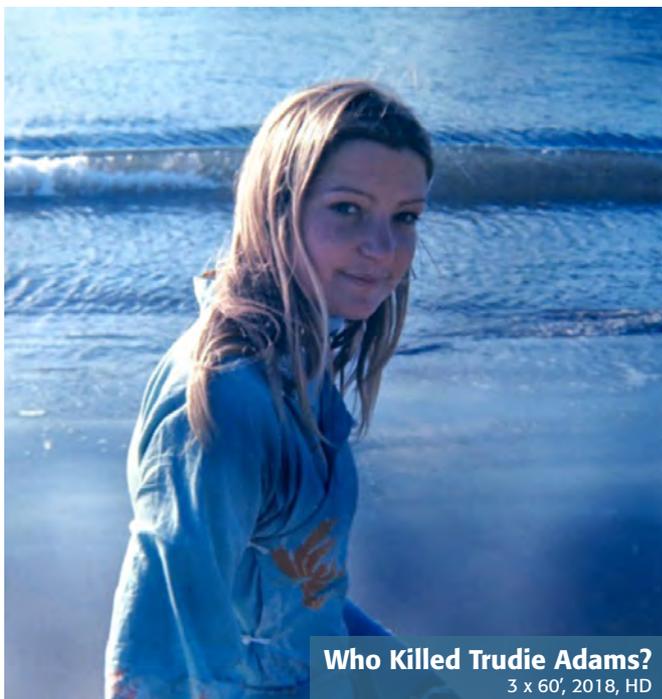

### Lifers: Behind Bars

2 x 60', 2017, HD

This groundbreaking two-part series documents what it's like to serve a long-term prison sentence, from the moment the judge delivers the sentence through to release. Filmed over a year with unprecedented access to Scottish courts and prisons, men convicted of murder and serving a mandatory life sentence speak candidly about their crimes, their struggles in prison and their remorse – or lack of it.

### Who Killed Trudie Adams?

3 x 60', 2018, HD

Trudie Adams asked her mum to wait up for her the night she left the party at Newport Surf Club and put her thumb out into the traffic on Barrenjoey Road. She never made it home... Almost 40 years on, Trudie's disappearance remains a mystery, an infamous cold case that stands in stark relief against the cool surf culture, the gleaming new suburbs and malls of Sydney's Northern Beaches in 1978. Over the years, more and more facts have emerged. They combine to make the picture more intriguing and chilling. There is far more to this story than just an unsolved murder. This true crime story begins with Trudie and what may have happened to her long ago. But it leads, over three compelling hours, into the dark heart of Australia now: high-level corruption, cover-ups, massive drug deals and many murders in which the bodies have not remained hidden.

**WildBear Entertainment**

### The Murder Of JonBenét

2 x 60' or 1 x 60', 2016, HD

Who killed six year old beauty pageant queen JonBenét Ramsey in the dead of night? Twenty years after the child's body was discovered in the basement of the family's Colorado home on Christmas morning, the mystery remains unsolved. Now, with access to the massive case archive assembled by director Lawrence Schiller, the story is told in a way that no other documentary can - through interviews and evidence from people intimately involved with the tragedy. Schiller talks to family members, police detectives and members of the District Attorney's office and uncovers fresh information from those involved to tell the story of JonBenét's killing like never before. Time has not diminished the spectre of JonBenét - the macabre gaudiness of beauty pageant America always seemed a curiously appropriate backdrop for a crime of the worst order.

**WS Productions, Inc./1895 Films**

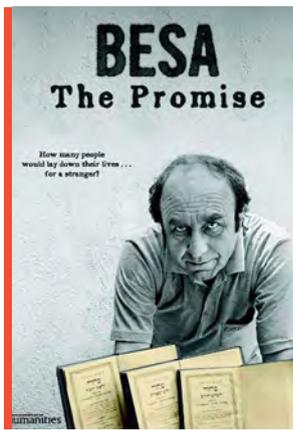

### A Question Of Innocence

1 x 60', 2014, HD

This political documentary takes a look at the death penalty in the United States, centering on Tommy Zeigler who has been on death row in Florida for almost four decades. While new evidence has surfaced that may prove Zeigler's innocence, Florida Gov. Rick Scott is campaigning to accelerate the schedule of upcoming executions.

**Mystique Films**

### BESA: The Promise

1 x 86', 2009, HD

Follow the journeys' of two men as they reveal Albania's secret heroism in WWII. Norman Gershman, a renowned Jewish-American photographer determined to document first-person accounts of the Albanian Muslims who rescued Jews during the Holocaust and Rexhep Hoxha, a Muslim-Albanian who must fulfill the promise made to a Jewish family his father rescued during the Holocaust and return to them a set of Hebrew books they left behind.

JWM Productions

Director: Rachel Goslins

### The British Garden: Life And Death On Your Lawn

1 x 89', 2017, HD

The British back garden is a familiar setting, but underneath the peonies and petunias is a much wilder hidden world, a miniature Serengeti, with beauty and brutality in equal measure. In this documentary, Chris Packham and a team of wildlife experts spend an entire year exploring every inch of a series of interlinked back gardens. They want to answer fundamental questions: how much wildlife lives beyond our back doors? How good is the British garden for wildlife?

Windfall Films

Director: Tom Cook

### Cantabria: Spain's Magical Mountains

1 x 90' or 1 x 60' or 2 x 60', 2018, HD

The Cantabrian region is a magical, mysterious place with many secrets yet to be discovered. It's a kingdom of forests, rough canyons, high mountains and amazing wildlife; filled with primeval landscapes where fantasy and reality blurs. Throughout the four seasons we will tell stories of the secret lives of our main characters; the brown bear, the wolf, the wildcat, the snow grouse, the salmon, solicitous ants and magnificent spiders and butterflies.

### Circus Of The Wild

1 x 90' or 1 x 60', 2018, HD

Barbary macaques are up to mischief in Gibraltar; pickpocketing unwary tourists. Their relatives, the Japanese macaques, are much more laid back. On Ellesmere Island, the wolves there have found a lost phone, now they're playing football with it. They make us wonder. Especially when they turn up in unexpected places. Like little droll penguins that toddle over the sandy beaches of South Africa. Shouldn't they be somewhere a little, well, cooler?

### The Bit Player

1 x 89', 2019, HD

Claude Shannon is the unknown genius who laid the foundation for the information age. He also constructed a mathematical theory of juggling, rode a unicycle, wrote the first paper on computer chess and built a flaming trumpet! 'The Bit Player' tells the inspiring story of a man who revolutionised the world, but never lost his childlike curiosity.

An IEEE Information Theory Society Production

Director: Mark A Levinson

### Food Evolution

1 x 92' or 1 x 60', 2017, HD

Directed by Academy Award nominated Scott Hamilton Kennedy and narrated by Neil deGrasse Tyson, 'Food Evolution' looks at the debate surrounding GMOs and food. Travelling around the world, the GMO debate, both pro and anti camps claim science is on their side. Who's right? 'Food Evolution' shows how easily misinformation, fake news, confusion and fear can overwhelm objective analysis.

Black Valley Films in association with Boomdozer

Director: Scott Hamilton Kennedy  
Narrated by: Neil deGrasse Tyson

### The Game

1 x 106', 2017, 4K

This is a story of Hip Hop culture conquering the world and today being a lifestyle and global business. Artists like 50 Cent, Ice T, Chuck D, Young Thug, Grandmaster Caz, Melle Mel... and the leading engineers of this success explain the mechanics of this accomplishment and project themselves into the digital future. See the story of the artists that have become global brands and changed the rules of the game, entering a forbidden frontier for black artists: Wall Street.

### The Most Unknown

1 x 90', 2018, HD

'The Most Unknown' is an epic documentary film that sends nine scientists to extraordinary parts of the world to uncover unexpected answers to some of humanity's biggest questions. How did life begin? What is time? What is consciousness? How much do we really know? By introducing researchers from diverse backgrounds and dropping them into new, immersive field work, the film pushes the boundaries of how science storytelling is approached.

A Motherboard Production

Director: Ian Cheney

## Nefertiti: The Lonely Queen

1 x 90' or 3 x 60', 2019, HD

'Nefertiti: The Lonely Queen' looks at the status of cultural treasures taken from their country of origin. Voices demanding repatriation are getting stronger - the resistance of the former colonial powers holding on to these cultural cornerstones grows accordingly. Museum directors talk about why their institution is the rightful owner and custodian of certain objects. People demanding repatriation explain the necessity of guarding their cultural heritage in an accessible place in the home country. This is only one part of the big picture.

Markell Production/Heretic/  
Films Transit

Director: Thorkell Hardarson & Örn Marinó

## Revolution In Colour

1 x 90', 2015, HD

'Revolution in Colour' tells the story of Ireland's struggle for independence during the early 20th Century, not in black and white but in colour. The newsreel, primarily from the British Pathé archive with additional footage from the British Film Institute and the Irish Film Archive, has been painstakingly restored and colourised. The end result creates a powerful emotional connection with the people, the personalities and the past bringing Irish history to life in colour.

Zampano Productions/British Pathé

Producer & Director: Martin Dwan

## Saving Giants

1 x 88' or 1 x 60', 2018, 4K

At the southernmost tip of Africa, the world's pre-eminent giraffe researcher is leading an unprecedented expedition, to undertake the most ambitious giraffe research project ever attempted. Following the success of 'Walking with Giraffes', the first film to bring global awareness of the threats affecting the giraffe conservation, comes this bold new film. Saving Giants is on a mission to provide hope in the conservation of giraffes where populations and habitats are declining rapidly.

Iniosante, Inc.

## Spider House

1 x 89', 2014, HD

Ever wondered what spiders really get up to in your home? In this special, Alice Roberts overcomes her arachnophobia to enter a spider-filled house where an astonishing drama unfolds within its walls. Inside she meets entomologist, Tim Cockerill, who loves spiders and quickly immerses Alice in the wonders of web-building, the secrets of fly-catching and the dangerous spider-eat-spider world they inhabit.

Windfall Films

Producer & Director: Tom Cook & Clare Stronge

## The Trick With The Gun

1 x 90', 2017, HD

What happens when friends risk their lives and friendship for the sake of a magic trick? The bullet catch is the most dangerous illusion in magic. Men and women have died performing it. Magician Scott Hammell and author Chris Gudgeon set out to perform their own version of the deadly trick, and get more than they bargained for. What begins as an exploration of the hidden world of magic ends as a study of a friendship falling apart.

Markham Street Films

Director: Iris Ng  
Featuring: Scott Hammell & Chris Gudgeon

## Untamed Romania

1 x 90' 2018, 4K

'Untamed Romania' celebrates Romania's astounding beauty and sheer diversity of wild animals. Vast mountains, ancient forests and expansive wetlands provide undisturbed habitats to many of the continent's iconic creatures. From the forested slopes of the Carpathian Mountains, to the wind blown waters of the Danube Delta. Untamed Romania reveals how the country's creatures adapt to the varying seasons, and how forests in particular are crucial to their existence.

Director: Tom Barton-Humphreys

## Victoria And Albert: The Wedding

1 x 90' or 2 x 60', 2018, HD

Historian Lucy Worsley oversees a glorious re-imagining of the wedding of Queen Victoria and Prince Albert. Lucy painstakingly recreates the important elements of the wedding celebrations, scouring history books, archives, newspapers and even Victoria's own diaries for details. From the dress, to the bouquet, to the beautifully tiered cake and the music for the ceremony; each element will be carefully researched and used in a dramatic re-staging of the big day.

BBC Studios Unscripted Production/  
BBC/PBS

Producer & Director: Ian Denyer

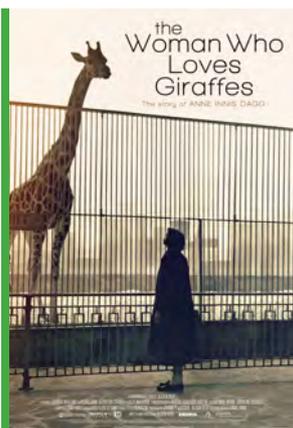

## Vitaminaia

1 x 90', 2018, HD

This year \$90 billion will be spent on vitamins and supplements. Every week, a new benefit is claimed. At the same time, vitamin pills are decried as a waste of money and their producers condemned. Many doctors claim most vitamin products are useless, or can even be harmful. Others point to peer-reviewed research showing they can be lifesavers. We ask presenter Dr Derek Muller how do we decide what to take and how do we sort the sense from the nonsense?

Genepool Productions

Director: Sonya Pemberton

## The Woman Who Loves Giraffes

1 x 83' or 1 x 60', 2019, HD

In 1956 at the age of 23, Anne Innis Dagg travelled to South Africa to become the world's first scientist to study the behaviour of an animal in the wild. Her pioneering efforts were groundbreaking, but her career was destroyed upon her return home. In 'The Woman Who Loves Giraffes', Anne takes us on her first expedition back to Africa to retrace her trailblazing journey and offers an intimate window into her life as a young woman, juxtaposed with a first hand look at the devastating reality that giraffes are facing today.

Free Spirit Films

Director: Allison Reid

## V-Day: Volcanic Planet

1 x 120', 2018, 4K

V-Day asks: What would happen if all of the volcanoes erupted on a single day? Join scientists around the globe as they deploy the latest technology to understand and predict volcanic behaviour. Spectacular footage of past and current eruptions, combined with CGI based upon the latest scientific discoveries, puts us right in the heart of volcanoes. Then, by speeding up the action into a single day, we get a new perspective on the remarkable forces that have shaped our planet for millions of years.

Pioneer Productions/Smithsonian  
Networks

Director: Roeland Doust

## Wild Ways Of The Coast

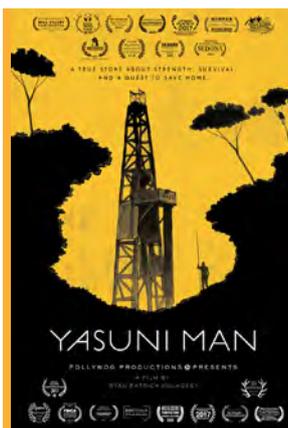

1 x 90' or 1 x 60', 2019, HD

To many life-forms, the border between land and sea is an invaluable habitat. From cliffs to tidepools, from reefs to sand dunes - all are home to members of the animal kingdom. It is an environment of extremes where seal colonies take advantage of the cool waters and the fish that congregate here. The seals attract predators, but the surrounding cliffs make an attack by predators unlikely. Some animals spend all of their lives here. But not all.

Terra Mater Factual  
Productions

Writer & Producer: Andrea Gastgeb  
Executive Producer: Sabine Holzer

## Yasuni Man

1 x 86', 2018, HD

'Yasuni Man' is a film about a conflict raging deep within the Ecuadorian Amazon. Once under siege by missionaries seeking to civilise them, the Waorani people battle industry operatives and their own government in a fight to survive. Join filmmaker Ryan Patrick Killackey and his native friend Otobo as they embark on an expedition into the most biodiverse forest on Earth. Witness what may be lost as oil companies encroach, human rights violations run rampant, and an eden of a forest is destroyed - all for the oil that lies beneath Yasuni.
