

## Air Warriors (Series 4)

3 x 60'

EPISODIC BREAKDOWN

### 1. Episode 001

No other fighter plane in the world has the reputation like that of the P-51 Mustang. Fast, nimble, beautiful and lethal, this craft is arguably the best all-around fighter plane of WW II. The darling of pilots and the nemesis of the German Luftwaffe, the Mustang is one of the most famous aircrafts in

history. In this episode of AIR WARRIORS, we detail the life and exploits of the indomitable P-51 Mustang.

### 2. Episode 002

It's been a vital aircraft for the US Air Force for over 60 years, from initial patrols during the Cold War to bombing missions over Afghanistan and Iraq. It's capable of carrying over 70,000 pounds of weapons and can fly at 50,000 ft on missions over 6,000 miles long. And while—thankfully—it's never been deployed to drop nuclear bombs as it was originally intended, the B-52 Stratofortress has been a bomber that instilled fear and panic in our enemies.

### 3. Episode 003

It's designed to be a superior fighting machine. It's able to withstand any kind of weather. And even though it just celebrated its 50th birthday, it shows no sign of slowing down. In this episode of AIR WARRIORS, we profile the F-16 'Fighting Falcon', one of the premiere fighting jets in the world.
